Attractions for 1884-5.

No printed periodical can take the place of parent, pastor, or school teacher; but a good magazine can sapplement their work and influence to a wonderful degree. In view of this, it is not extravagant to say that—instead of "Can we sflord to take ST. NCHOLAS?"—the question of every earnest household in English—speaking countries, to-day, should be "Can we afford not to take St. Nicholas.

The magnzine, during its eleven happy years of existence, under the editorial charge of Mary Mapes Dodge,

Mary Mapes Dodge, has grown familiar to hundreds of thousands of young readers; and their interest and intelligent enjoyment have constantly inspired the editor and publisher to fresh effort. To day, its strength is in its wholesome growth, its sympathy with young life, its hearty recognition of the movements of events, and its steadily increasing literary and pictorial resources. The following are some of the good things already secured for future numbers of ST. NICHOLAS:

"His One Fault," a serial story, by the

Armsdale, Nov. 6, 1884.

Mr. Editor: When I last wrote farmers were looking forward to an abundant harvest and most of them were not disappointed, although there was some trouble in getting the grain in sheaf before shelling, as all the grain seemed to ripen at once. Wheat in this county averaged 15 bushels to the acre, and very good, hard wheat. We had 3056 bushels on 400 acres. My husband employed a steam thresher which thresh, ed as high as 1300 bushels per day.

We felt very proud of our crop of potatoes as we raised them with so little trouble. They were plowed in the ground when planted, then just as they were coming up they were harrowed over twice with an interval of about two weeks between the harrowings; then when budded for blossoms, they were hilled with a plow, and this fall dug with a sulky plow. From 31/4 acres of ground we had 500 bushels of splendid large potatoes. The farmers are behind in their plowing this season. The ground is trozen now so they have had to stop plowing and prepare for winter, but we expect good weather yet as we always have very pleasant falls.

Wild geese have been very plenty this fall; people have had to poison them besides killing what they could with firearms, as they were destroying the corn crop. Wheat is very low. Farmers are almost discouraged, as last season's crops were a failure and this season's prices are a failure. They are only paying 45 cents per bushel for hard wheat. Those that can, are holding their grain, hoping to get more.

We all work very hard during the summer, but we have a long winter before us with nothing to do but caring for the stock and poultry. Father and sister from Hokah, Minn, have been visiting us this summer but have returned home. They were well pleased with our home and the country. My husband's brother-in-law from Minneapolis has just returned home from a visit here and says all the fault he finds with this country, is there is too much of it. He would travel all day and find the same level prairie specked with small towns and farm houses.

Politics is the order of the day. Republicans are in a large majority, and although we have nothing to say as yet in regard to presidential election, we are none the less interested and hope soon.to become one of the states.

ROSA CHURCHILL.

What Were They!

And it came to pass on a certain daylast week that the inhabitants of Hunting, ton were start'ed by the appearance of a squad of beings in our streets, which, like Barnum's "What is it?", raised the inquiry of "What are they?" Some said they were those that were scattered to the four winds last spring by the great cyclone; others that they were Darwin's "missing link." But the older and wiser adjusted their spec's and said: "Nay, my friends, they are Democrats, who were driven into their holes in 1860 by the "Great Rail Splitter," their appearance indicating that the political and moral dial had been turned back to that date. If this last solution is correct, we beg the good people of Huntington to have charity, and forgive their wild and dilapidated

Washed-Out Hair.

Their is a sort of pallid, chalky complexion which the novellsts call a "washed out complexion." It is ghastly enough and no mistake. Washed-out, faded, discolored, or parti-colored hair is almost as repulsive and melancholy. Parker's Hair Balsam will restore your hair to it-original color, whatever it was; brown anhurn or black. Why wear moss on your head, when you may easily havilively, shining hair.
